EOLYS®

Solvay has been involved in the development of over a hundred applications.
The Group develops solutions for its partners – major OEMs and component manufacturers.

EOLYS® by Solvay, the best solution for regeneration.

Once collected in the filter, the particles need to be eliminated to prevent it from blocking up and ceasing to function. The only way to destroy them is to burn them. The active ingredient of the EOLYS® fuel-borne catalyst is continuously delivered to the soot particles collected in the filter. The EOLYS® system makes it possible to completely, quickly and regularly burn out these particles at a lower light-off temperature without compromising the long-term integrity of the filter. Filter regeneration only takes two to three minutes and happens automatically every 500 to 1.000 km.

EOLYS POWERFLEX® by Solvay, the best solution for regeneration.

Walker® was offering you the 2 Eolys® DPX42 and 176 (both in 2 packaging). As of today, Walker® has extended his range with the new Eolys Powerflex® (also from Solvay). Powerflex® is working like Eolys® DPX42 and 176 but on top of helping the DPF regeneration, the new Eolys® is improving **Engine Performance Efficiency** by optimizing the **Power efficiency**, controlling the **NOx/PM engine-out stability** and providing **Biofuels flexibility**.

(GB) IMPORTANT FACTS ABOUT WALKER EXHAUST SYSTEMS
(F) INFORMATION IMPORTANTE CONCERNANT LES SYSTÈMES D'ECHAPPEMENT WALKER

(GB)

- According to the European law, all converters and silencers installed within the European Community borders have to be homologated.
- Consequently, Walker converters and silencers are fully homologated to European Directive 70/157/EC, their subsequent updates and according to ECE-R103.
- This will guarantee the end user / installer that the unit being installed is equal in back pressure, noise levels, fit and function to the original equipment (O.E.) version designed by the vehicle manufacturer.
- The homologation code can be found in the lower housing of the converter or silencer. Configuration, position and size of the code are always according to the specific criteria defined by the European Directives.
- The homologation documents for each Walker converter or silencer can be provided should the Technical Vehicle Inspection (MOT) require them.

(F)

- Conformément à la loi Européenne, tous les catalyseurs et silencieux installés au sein de la Communauté Européenne doivent être homologués.
- En conséquence, les catalyseurs et silencieux Walker sont officiellement homologués et répondent pleinement à la Directive Européenne 70/157/EC, et à ses mises à jour, conformément au ECE-R103.
- Cela garantit à l'utilisateur final/ installateur que la pièce installée est de qualité équivalente - en termes de contre-pression, niveau sonore, montage et fonctionnalité - à la version d'équipement d'Origine (OE), développée par le Constructeur automobile.
- Le code d'homologation se trouve sur la partie inférieure du catalyseur ou du silencieux. La configuration, position et taille du code respectent dans tous les cas le cahier des charges défini par les Directives Européennes.
- Les documents d'homologation de chaque convertisseur catalytique ou silencieux Walker peuvent être fournis, dans le cas où le Contrôle Technique l'exige.

- Nach Europäischem Recht müssen alle Schalldämpfer und Katalysatoren, welche innerhalb der europäischen Grenzen im Einsatz sind, eine Betriebserlaubnis haben.
- Konsequenterweise werden alle Schalldämpfer nach der EG- Richtlinie 70/157 und alle Katalysatoren nach ECE 103 R geprüft. Die Messungen erfolgen nach dem jeweils gültigen Richtlinienstand.
- Dies garantiert der Werkstatt und dem Fahrzeugbesitzer, dass das Ersatzteil, in Bezug auf Gegendruck, Lautstärkepegeln, Passgenauigkeit und Funktion, gleichwertig zu dem Originalteil des Fahrzeugherstellers ist.
- Die Nummer der Betriebserlaubnis befindet sich auf der Unterseite des Schalldämpfers oder Katalysators. Die Art, Position und Größe dieser Nummer entspricht den Anforderungen der EG-Richtlinie.
- Alle Unterlagen für die Betriebserlaubnis der Walker Schalldämpfer und Katalysatoren sind verfügbar, sofern der technische Prüfdienst (TÜV) diese benötigt.

(NL)

- Volgens de Europese Wetgeving moeten alle katalysatoren en uitlaten die binnen de grenzen van de Europese Unie gemonteerd worden een homologatie hebben.
- Bijgevolg, zijn alle Walker katalysatoren en uitlaten volledig gehomologeerd overeenkomstig de Europese Directieve 70/157/EC en opeenvolgende aanpassingen ervan en overeenkomstig ECE-R103.
- De eindgebruiker / installateur krijgt hierdoor de garantie dat het te installeren onderdeel qua back pressure, geluidsniveau, correct passen en functioneren identiek is aan het origineel onderdeel (O.E. versie) van de autofabrikant.
- Het homologatienummer vindt men onderaan de behuizing van de katalysator of de uitlaat. De configuratie, positie and afmetingen van het nummer voldoen steeds aan de specifieke criteria zoals bepaald door de Europese Directieven.
- De homologatiedocumenten kunnen voor elke Walker katalysator of uitlaat ter beschikking gesteld worden mocht de Technische Autocontrole erom vragen.
