THRUSH EXHAUST

MASTER CATALOG
2015

INNOVATION. HORSEPOWER. PERFORMANCE.

DynoMax® Performance Exhaust, a leading performance exhaust brand built on over 29 years of market leadership, is introducing several new exciting products and applications captured inside this catalog. Each and every DynoMax® product is backed by engineers who know what you want and expect out of a performance exhaust product. . . and who exceed your expectations every time.

Driven by the theme **Pure, Unadulterated, Power,** the DynoMax® brand will continue to launch new systems featuring its exclusive DynoMax VT® muffler, a revolutionary, high-flow stainless steel performance muffler that controls irritating drone while ensuring maximum performance on a full-range of street applications.

Be sure to check out the complete line of DynoMax® stainless steel systems and products, a feature we're sure you'll appreciate. Flip through these pages and see just how much horsepower and performance a DynoMax® Performance Exhaust can add to your vehicle.

TABLE OF CONTENTS:

UNIVERSAL MUFFLERS

DynoMax VT® Mufflers	2 - 3

PERFORMANCE MUFFLERS

RACE SERIES BULLET

- Aluminized and 409 Stainless steel construction
- Designed for vehicles with limited space
- Light weight compact design
- 100-percent welded construction for maximum durability
- CRF Technology provides up to a 4 dBa sound reduction, while maintaining a deep race tone (on most race applications)

RACE SERIES MINI BULLET

- 409 Stainless steel construction

Available in:

3.5-in. and 4-in. round mufflers
3.5-in. and 6-in. shell length
6.5-in. and 9-in. overall length
3-in., 3.5-in. and 4-in. inlet diameter
3-in. and 3.5-in. OD outlet diameter

STAINLESS STEEL STRAIGHT TUBING

- Stainless steel lasts 10 to 12 times longer than low carbon steel tubing
- Type T-409 stainless steel tubing is used for easier bending

Note: Bending characteristics of stainless steel tubing are substantially different than low carbon steel tubing. Listed below are important factors in successfully bending stainless steel tubing.

1. Wing die (back) pressure may need to be increased to prevent backwall collapse.
2. The tube weld seam should be located 90° from the inside and outside of any severe bends.
3. Wing dies must be in good condition & in alignment throughout the entire bending arc.
4. Bends should be made in one continuous operation at a slow rate of speed.
5. Bends should not be made tighter than two times pipe diameter.
6. Equipment must be in proper operating condition.

DUMPS

Manufactured using type 409 stainless steel. The DynoMax® Dumps feature ID sized inlets and outlets allowing for easy slip-fit installation with no welding required. They are perfect for the DIY'er! The outlet block-off plate is a loose flange for improved clearance and fit. High quality extended length bolts are combined with hex nuts or wing nuts for ease of use.

- Fully welded
- Type 409 Stainless steel
- Aggressive tone
- All hardware and gaskets included

Used in fitting when oxygen sensor is not required

DYNOMAX® HAS TAKEN THE GUESSWORK OUT OF FABRICATING AND CONVERTING A HEAVY-DUTY TRUCK EXHAUST SYSTEM.

The DynoMax® Truck Staxx kit enables light-truck and diesel owners to convert their existing exhaust outlet using two upright stacks located behind the passenger compartment. Available in a 4-in. angled outlet.

DynoMax® Truck Staxx kit includes stacks reducers, elbows and hardware for a complete installation.

FIND THE PERFECT SEALING SOLUTION FOR YOUR HOT ROD OR RACE CAR.

DynoMax® has you covered from the budget friendly U-Bolt Clamp to the great looks and ease of exhaust installation and removal of the polished Stainless Steel Mega Clamp. The AccuSeal™ Clamp combines the high clamping force of the U-Bolt Clamp with all the advantages of the Mega Clamps. These clamps also have the added advantage of being effective very close to a bend in the pipe where a Mega Clamp would be too wide to seal effectively.

\# Tail Pipes exit each side of vehicle behind rear tires.
* Both tail pipes exit on the passenger side behind the rear tire.
§ Both tail pipes exit on the drivers side at the bumper.
@ Tail pipes exit each side of vehicle at the rear bumper.
7 305 Chevrolet small block V-8 engines.
40 Dual kit runs down right hand side between frame and drive shaft.
49 Not legal for sale on pollution-controlled motor vehicles.
50 Will not fit 1 Ton 4 x 4.
53 Will not fit standard transmissions in years 1971-76.
101 Fits only on trucks with O.E. catalytic converters because of cross member location. Not intended or applicable for highway use.

NOTE: Not legal for sale or use in California on 1975 or later model catalyst-equipped vehicles, except racing vehicles which may not be used or operated on a highway. Pre-catalyst vehicles must utilize original emission control devices. It is the responsibility of the customer to reinstall these devices on the vehicle. In all other states, these headers are for racing use only and not intended or applicable for highway use.

All measurements are in inches. Configuration is shown as inlet - outlet. Shell diameter is shown as height x width. Inlet/outlet diameter is ID.

THRUSH® GLASSPACK

STRAIGHT-THROUGH TECHNOLOGY

Straight-through design for maximum flow and power

Heavy-gauge steel shell construction

Available in 1.75-in., 2-in., 2.25-in., 2.5-in., or 3-in. inlet and outlet

High Gloss Red Powder Coat Finish or 304 Polished Stainless Steel

Dual outlet models available

PIPE DIAMETER

A common misconception is that the larger the diameter, the better the system. But, bigger isn't always better. Systems that are too large in diameter can actually hurt performance.

As a general rule, switching to a performance system that is 1/49 to 1/29 larger than stock will provide you with the best horsepower increases. To determine which pipe diameters will be best for your system, decide what RPM range your engine will operate at, most of the time. Smaller diameter pipes will produce low - to mid-RPM torque. Larger diameters produces mid-to high RPM torque.

MANDREL BENDING

Horsepower Depends on Flow, not Pipe Diameter Alone

Bigger isn't always better. Systems that are too large in diameter can actually hurt performance. Improved flow is what you need.

Having large diameter pipes isn't what's cool. Going fast and making horsepower is.

X-Pipes help to even out the pulses in the exhaust gases and balance the backpressure between both banks of your engine. They not only help improve horsepower, but sound as well.

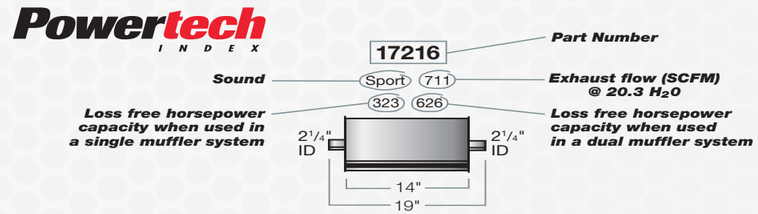

To find the right location to install your X-Pipe, apply a strip of paint down the front portion of the exhaust pipes. The X-Pipe should be placed where the paint burns off (bubbles on the exhaust pipes). Generally, put the balance tubes as close to the headers as possible.

The X-Pipe diameter should be at least 75% of the diameter of the pipes with which it connects.

DON'T KNOW WHAT MUFFLERS TO USE ON YOUR CAR!

Use the Powertech Index™ to find the muffler that will optimize your Horsepower and torque.

How to determine necessary exhaust flow:

Engine horsepower x 2.2 = Loss Free Airflow Capacity needed for a muffler used in a single system
For a dual system, divide the single system number by 2 to determine the Loss Free Airflow Capacity needed for each muffler

Example:

300 Hp x 2.2 = 660 SCFM single or 330 SCFM dual
(SCFM: Standard Cubic Feet Per Minute)

PERFORMANCE AND SOUND GUARANTEE

We challenge you to try our DynoMax® performance mufflers* risk-free for 90 days - if our products* don't meet the challenge, call us for your money back.

90-DAY RISK FREE TRIAL

Try qualifying DynoMax® products* for 90 days. We guarantee you'll experience the DynoMax® performance difference! If, for any reason, the qualifying products* don't live up to your expectations within the first 90 days, replace the products and we will refund your original product's purchase price (which shall not exceed the manufacturer's suggested retail price), plus labor (up to $50 per exhaust system). We're that confident you will be satisfied with DynoMax® performance products! For questions about this offer, please contact our customer service department at 734-384-7898.

*Offer limited to the purchase of DynoMax® Stainless Steel Cat-Back Systems and Ultra Flo™ SS Polished, Ultra Flo™ Welded, DynoMax® VT® or Super Turbo™ performance muffler. This offer does not include products which have been modified, improperly applied or installed on vehicles used for commercial or racing purposes. Valid only on vehicles used for private, non-commercial use and may be withdrawn at any time.

LIMITED LIFETIME WARRANTY

LIMITED TO QUALIFYING DYNOMAX PRODUCTS ONLY

Tenneco Inc. warrants qualifying DynoMax® products against defects and wear-out when used on private passenger cars and light trucks under normal operating conditions for as long as such original purchaser owns the vehicle on which they were originally installed.

LIMITED LIFETIME WARRANTY QUALIFYING PRODUCTS

DynoMax® VT® Mufflers
DynoMax® Ultra Flo™ SS Polished Mufflers
DynoMax® Ultra Flo™ Welded Mufflers
DynoMax® Super Turbo™ Mufflers
DynoMax® Stainless Steel (38XXX and 39XXX Series) Systems

Tenneco's obligation under the Limited Lifetime Warranty and 90-Day Limited Warranty is limited to replacement of the worn-out or defective product with the same (or substantially comparable) product in accordance with this warranty. Cost of removal and installation are not included, and any incidental and consequential damages are excluded under this warranty, regardless of when the failure occurs. These warranties have no cash value. The warranties no apply to products which have been modified, improperly applied or installed on vehicles used for commercial or racing purposes.

To make a claim under the applicable warranty, return the worn-out or defective product with the dated original receipt to the dealer from whom it was purchased or to a Tenneco dealer for verification and exchange under the warranty.

The applicable warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Any implied warranties you may have under state law are limited to the same duration as this warranty.
Some states do not allow limitations on how long an implied warranty lasts or do not allow the exclusion or limitation or consequential damages, so the above limitations and exclusion may not apply to you.

Tenneco will contact warranty-serviced consumers to conduct customer satisfaction surveys relating to product and warranty service. Survey activity will provide valuable feedback and help measure the level of consumer satisfaction in different markets.

Information or assistance regarding a warranty claim may be obtained by writing:
Warranty Department / Tenneco
One International Drive
Monroe, MI 48161
or by calling: 1 (734) 384-7898
